

SMART MOTORWAY TUNNEL

Build to provide traffic relief on the main Southern gateway to the City Center from the South (KL-Seremban Highway) and West (Federal Highway).

Designed to be an alternative traffic dispersal system while shortening travel time for vehicles.

The 3.0km motorway tunnel is only accessible to Cars, MPVs and SUVs not exceeding 2.0m in height. No motorcycles, buses or lorries are allowed in.

Entry and Exit points are via **Jalan Sg.Besi, Jalan Davis and Jalan Tun Razak** near Kg. Pandan roundabout.

This provides a quicker route to reach the popular destinations in the Golden Triangle. Getting to Times Square, Sg. Wang, Lot 10 or even KLCC Twin Towers is more convenient with the SMART Tunnel.

This Tolloed Tunnel with Touch N' Go facility is safely monitored for 24 hours patrol by CCTVs routed to Command Center. Emergency phones are available as with Mobile Phone reception. The convenient and comfortable traveling through the Tunnel is accommodated by the availability of FM radio reception.

Get to your Destination in the City Center the SMART way...
